

# Seeing your World from anywhere

## Smart Technology

### Plug & Play

The must-have feature in home security market. StarVedia's IP camera works in any network environment including router behind router.

1. Connect to network
2. Install app on your mobile devices
3. Key-in ID/Password to see video immediately

## P2P Video Streaming

1. Peer to peer technology decrease the video stream latency.
2. The video stream does not pass through the server, users will not need to worry that the video could be captured by the server or being hacked.
3. User accounts are not stored in the server, no need to worry if the server is hacked.

## WiFi Setup

Set up the wifi of the camera on the fly.

1. Don't need a computer to configure the camera for WiFi setup.
2. A mobile device is enough to do this WiFi setup of the camera.
3. Make true the plug and play setup.

## Hycom IP Camera Range

Priced From only \$300 each camera it's such a little price to pay to protect what is priceless or valuable to you. (PC or Digital Video Recorder Not required)

A must for every Home and Business – From Home Security, Home Care, Elderly & Children, Pool, Pets, Work Monitoring, Video Meetings & Demonstrations, Building Surveillance or Protecting your favorite Toy.

Hycom IP Cameras are the easiest to program in the market with 3 easy steps. Once Installed you have full access from Apple or Android Phone, or Ipad anywhere in the world. No other Camera has the ease and benefits at an affordable price. Don't be fooled by cheaper alternatives as you need to be an expert to configure them. Give our team at Hycom a call or come in to our showroom for a free Demonstration. Protect your Valuables before it is too late.
